## Cuyahoga River Old Channel Remedial Design

- The cost estimate (and identify if it's a placeholder amount or range)\* \$250K, placeholder, funds potentially needed to finish design
- Entity who will receive funding/mechanism of funding USACE Economy Act IA
- Type of project (BUI eval., habitat, GLLA etc.) GLLA
- What tier the project is 1a (ongoing and existing project)
- Whether it's on an approved management action list ?? Loomis to confirm
- BUI(s) it addresses multiple
- When the project will need funding and (confidence level that it will occur this FY) Q2 (as of right now, I have low confidence that we would need funds in Q2, but things may change quickly depending on GW results and discussions with OLEC/OEPA regarding non-federal match)
- When the project will be ready to go for approval (all details are set) Q2 (we have a lot of
  coordinating to do, but I think we'll be ready to make a decision regarding next steps for this
  project early in CY2021)
- If early funding is needed No
- Identify any potential red flags any regulatory overlap or issues (superfund, enforcement, etc.)
  and also things like if it's for work at a golf course, any LTM issues, is precedent setting or would
  perhaps be difficult to explain to the public. potentially precedent setting if it's the first GLLA
  PA to use a habitat restoration project at another site within the AOC as the non-fed match

## Cuyahoga River Gorge Dam Remedial Design

- The cost estimate (and identify if it's a placeholder amount or range)\* \$250K, placeholder, funds potentially needed to finish design
- Entity who will receive funding/mechanism of funding GLAES Task Order (CH2M/Jacobs)
- Type of project (BUI eval., habitat, GLLA etc.) GLLA
- What tier the project is 1a (ongoing and existing project)
- Whether it's on an approved management action list ?? Loomis to confirm
- BUI(s) it addresses multiple
- When the project will need funding and (confidence level that it will occur this FY) Q1/Q2 (low confidence that we will need funds due to unknowns at this time, depends on outcome of VE study and feedback from stakeholders on preliminary design)
- When the project will be ready to go for approval (all details are set) Q1/Q2 (if we need more funds, we may know by Oct/Nov)
- If early funding is needed maybe?
- Identify any potential red flags any regulatory overlap or issues (superfund, enforcement, etc.) and also things like if it's for work at a golf course, any LTM issues, is precedent setting or would perhaps be difficult to explain to the public. None

Mark – I think funds for construction for both projects won't be needed until FY22, so delete them from the FY21 budget table.
